**DETAILED ACTION**

**Claims 1-49 are pending in the application.**

***Election/Restrictions***

Applicant's election with traverse of Group IV (Claims 22-25 and 30 - drawn to a crystal) in the reply filed on July 19, 2007 is acknowledged. The traversal is on the ground(s) that since the invention of Group V relates to a process for preparing the crystal of Group IV, the inventions of Groups IV and Group V are linked so as to form a single general inventive concept under PCT Rule 13.1 and therefore, both groups may be properly examined together. This is not found persuasive because separate search considerations are involved in the examination of both Group IV and Group V.

The requirement is still deemed proper and is therefore made FINAL.

Art Unit: 1626

Claims 1-21, 26-29 and 31-49 are withdrawn from further consideration pursuant to 37 CFR 1.142(b), as being drawn to a nonelected invention(s), there being no allowable generic or linking claim. Applicant timely traversed the restriction (election) requirement in the reply filed on July 19, 2007.

***Priority***

Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

***Information Disclosure Statement***

The Examiner has considered the four Information Disclosure Statements filed on January 18, 2005, June 24, 2005, August 29, 2006 and November 27, 2006.

***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 22-25 and 30 are rejected under 35 U.S.C. 102(b) as being anticipated by Dekker et al. {Organometallics, (1984), 3(9), pages 1403-1407}.

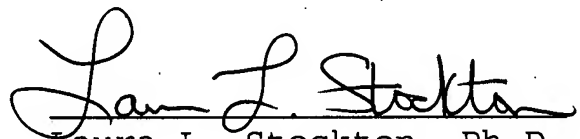

Dekker et al. disclose the ethyl ester of bromoacetic acid in dimeric form. See the entire document, especially the abstract on page 1403, Table II in the second column on page 1404, and the "Discussion" on page 1406 in column 1 and column 2, equilibria (2) on line 3.
